## DIGEST

**U.S. Agricultural Exports Up More Than 20 Percent** (see p. 2). U.S. agricultural exports during the first 9 months of fiscal year (FY) 1988 (October 1987-June 1988) rose 26 percent in value to \$26.5 billion, a \$5.5-billion increase compared with exports during the same months of FY 1987. Export volume rose 21 percent, a 20-million-ton increase. Virtually every major export commodity shared in this expansion, with wheat leading all other commodities in both value and volume growth.

**October-June Imports Reach \$15.9 Billion** (see p. 6). U.S. agricultural import value during the first 9 months of FY 1988 remained on a pace equal to a year ago at \$15.9 billion. Imports in the last 3 months of FY 1988 (July-September 1988) must reach \$4.6 billion to meet the FY 1988 forecast of \$20.5 billion, \$500 million below the previous estimate. For the first three quarters of FY 1988, imports averaged \$5.3 billion per quarter.

**Appendix Tables** (see p. A-1). Tables cover quantities and values for U.S. agricultural exports and imports by commodity and country for October-June 1986/87 and 1987/88 and commodity prices for October-June 1987/88.

\*\*\*\*\*

Prepared by the Commodity and Trade Analysis Branch, Commodity Economics Division, Economic Research Service, U.S. Department of Agriculture. Principal coordinators were Thomas A. Warden and Mary L. Fant. Erma McCray provided word processing and table formatting support. Editorial support was provided by Teri L. Davis, Research Information Branch, Information Division, Economics Management Staff. Data processing support was provided by Sharlan Starr and William Meiller, International Economics System Branch, Data Services Center.

## U.S. AGRICULTURAL EXPORTS UP MORE THAN 20 PERCENT

U.S. agricultural exports during the first 9 months of fiscal year (FY) 1988 (October 1987-June 1988) rose 26 percent in value to \$26.5 billion, a \$5.5-billion increase compared with exports during the same months of FY 1987. Export volume rose 21 percent, a 20-million-ton increase. Virtually every major export commodity shared in this expansion, with wheat leading all other commodities in both value and volume growth. Reduced overseas supplies and the Export Enhancement Program (EEP) helped boost wheat shipments 13.4 million tons and \$1.3 billion. Exports of soybeans, corn, and cotton each grew more than \$700 million, exports of animal products grew \$563 million, and exports of horticultural products rose \$332 million. Export value fell for tobacco, barley, flour, and pulses.

### Wheat Exports Nearly Double

U.S. wheat exports rose 76 percent in volume to 31 million tons during the first 9 months of FY 1988, but they rose only 72 percent in value as the EEP lowered average export prices to match overseas competitors. While world prices for wheat and other commodities rose, the average per-ton value of U.S. wheat exports fell 2 percent to \$103. Wheat exports averaged \$93 per ton to the U.S.S.R. and \$83 per ton to China.

The U.S.S.R. became the largest U.S. wheat customer during the October-June FY 1988 period, rising from 778,000 tons during the first 9 months of FY 1987 to 8.8 million tons. This was the largest Soviet purchase of U.S. wheat in any October-September fiscal year. A poor Soviet wheat crop in 1987, tight supplies of milling-quality wheat in competitor countries, and offers of 9 million tons of EEP wheat accounted for the sharp rise in U.S. wheat sales to the U.S.S.R.

China, the second largest customer for U.S. wheat during the October-June FY 1988 period, also used the EEP to switch to buying wheat from the United States. U.S. wheat exports to China rose from 270,000 tons during the first 9 months of FY 1987 to 3.8 million tons in the same period of FY 1988. Japan was the third largest U.S. wheat customer, purchasing 2.3 million tons during the first 9 months of both FY's 1987 and 1988. None of Japan's purchases involved the EEP, and the average price of wheat exported to Japan rose from \$116 per ton to \$126 per ton.

### Prices and Volume Higher for Corn

U.S. corn export volume rose 3.6 million tons in the first 9 months of FY 1988 to 33.2 million tons, a 12-percent increase from its year-earlier level. Higher prices boosted export value 31 percent to \$3 billion. As with wheat, reduced supplies in competing countries helped boost the U.S. share of world corn markets. Reduced export availability in China and Thailand boosted U.S. exports to Japan, the most important U.S. corn customer, 2.4 million tons, despite stagnant Japanese consumption and imports. Exports to Other East Asian countries grew 1.4 million tons as both local consumption and the U.S. market share rose.

U.S. corn exports to Spain grew more than 1.2 million tons as a 4-year compensation agreement between the United States and the European Community (EC) took effect. Shortly after Spain acceded to the EC in January 1986, variable import tariffs cut off most non-EC corn imports in what had been a

2-million-ton market for the United States. The United States and the EC subsequently negotiated an agreement for a transition period during which non-EC exporters would gain access to the Spanish market. The United States captured a significant share of these non-EC sales.

However, as this influx of U.S. corn increased EC supplies of coarse grains, U.S. exports to some other EC markets fell. U.S. corn exports to Belgium fell 410,000 tons, and those to the Netherlands fell 374,000 tons. Increased imports of U.S. corn also helped boost EC coarse grain exports to some markets, and U.S. corn exports to North Africa fell 584,000 tons, partly because of increased competition from the EC.

Export value for U.S. oilseeds and oilseed products rose \$1.3 billion during the first 9 months of FY 1988. A \$788-million increase in soybean exports accounted for most of the gain, and a \$400-million increase in vegetable oil exports accounted for much of the remaining growth. Reduced Southern Hemisphere supplies boosted soybean export volume, while the EEP boosted vegetable oil exports. (Stephen MacDonald, Commodity and Trade Analysis Branch)

## OCTOBER-JUNE IMPORTS REACH \$15.9 BILLION

U.S. agricultural import value during the first 9 months of fiscal year (FY) 1988 (October 1987-June 1988) rose \$70 million above its year-earlier level to \$15.9 billion. Imports in the last 3 months of FY 1988 (July-September 1988) must reach \$4.6 billion to meet the FY 1988 forecast of \$20.5 billion, \$500 million below the previous estimate. For the first three quarters of FY 1988, imports averaged \$5.3 billion per quarter.

### Seasonal Factors on Target

The following index of seasonal factors for agricultural imports, based on October 1981-June 1988 data, shows that the July-September quarter is generally the slowest quarter:

Quarterly average = 100

October-December	97.9
January-March	105.5
April-June	101.2
July-September	95.5

The factors listed above closely predict the import trends in the current fiscal year:

<u>Quarter</u>	<u>Forecast</u>	<u>Actual</u>	<u>Percentage difference</u>
	<u>---Billion dollars---</u>		<u>Percent</u>
October-December	5.02	5.21	4
January-March	5.41	5.68	5
April-June	5.19	5.01	4
July-September	4.86	NA	NA
FY 1988	20.50	NA	NA

NA = Not available.

### Prices on the Rise

Import prices are 10-15 percent above those of a year ago and are at their highest level in 4 years. The 3-year decline in the dollar's value, starting in early 1985, is beginning to show up more prominently in agricultural import prices. Import prices of orange juice, vegetable oils, casein, live cattle, rubber, wine, beef, spices, and malt beverages have increased over the past year by as much as 50 percent. Prices of cocoa, sugar, and tobacco have changed very little, while prices of coffee, pork, grains, and cashew nuts have actually decreased.

Exchange rates are not solely responsible for these price movements. Export quotas (coffee, cattle), import quotas (sugar, beef), domestic price support programs (tobacco, grains), foreign supply shortages (coconut oil), and U.S.

and foreign demand expansion (palm oil), are a few other factors that shift exportable supply overseas, U.S. import demand, or both. These factors affect the way that prices are set. For example, coffee prices fell after the International Coffee Organization's system of export quotas broke down in February 1986. The removal of global export controls encouraged producers to flood the market with coffee, consequently driving down the price.

The price of imported orange juice has already increased more than 50 percent in FY 1988 and may eclipse the record high of \$32 per hectoliter (\$1.23 per gallon) set in FY 1985. This price increase has reduced U.S. import demand for frozen concentrated orange juice as imports through the third-quarter were down 22 percent from year-earlier levels. Juice imported from Brazil accounted for very little of U.S. supply in the early 1970's. Currently, Brazilian concentrate accounts for 35-40 percent of the U.S. orange juice supply.

#### Suppliers Influence Price

The number of suppliers or exporters and their share of the U.S. domestic market also influence import prices. For example, Brazil accounts for approximately 90 percent of U.S. imports of frozen concentrated orange juice and nearly 40 percent of the domestic market. The Brazilian orange industry is geared toward exporting frozen concentrated orange juice. Nearly 85 percent of all Brazilian oranges are processed, 90 percent of which are exported. CACEX, the Brazilian foreign trade agency, oversees the export system. Such coordination allows exporters to have market power when they wouldn't otherwise.

On the other hand, while Canada and Mexico make up nearly 100 percent of U.S. live cattle imports, these imports equal only 4 percent of all cattle slaughtered in the United States. The Brazilian position in the orange juice market illustrates a greater influence on price than do individual Canadian and Mexican cattle ranchers.

U.S. importers of coffee, tobacco, sugar, and vegetable oils have more than 30 suppliers each. Each supplier in a trade situation with few suppliers would have more market power than each supplier in a trade situation with many suppliers. In the case of rubber, 5 exporters supply 96 percent of the U.S. market and there are no U.S. producers. However, the close substitutability of natural rubber with synthetic rubber allows domestic users to shift from natural to synthetic rubber should imported natural rubber prices increase. (Stephen R. Milmo, Commodity and Trade Analysis Branch)
